Fort Bragg, CA 95460
Case No. 1TMC248

Notice of Proposed No Further Action related to petroleum hydrocarbon discharge.
Comment period ends December 26, 2002.

Problem Description: On July 27, 2001 a 372-gallon home heating oil underground storage tank (UST) was removed from this residential property. One soil sample was collected from the tank excavation pit. The sample was analyzed for total petroleum hydrocarbons as diesel (TPH-d) and volatile organic compounds (VOCs). TPH-d was detected at 24 parts per million. No VOCs were detected. There is one domestic well on-site, located approximately 10 feet from the location of the former UST.

Interim Actions Completed: The on-site domestic well was sampled on August 2, 2001, May 6, 2002, and August 23, 2002 and analyzed for TPH-d and VOCs. All results were reported below detection limits. No additional interim actions were completed.

MTBE Status: MTBE was not detected in any soil or groundwater samples.

Proposed Action: No further action related to this petroleum hydrocarbon discharge is proposed.

Case Closure with no further action will be completed without further notice unless significant public comment is received prior to December 26, 2002. Please contact Colleen Stone at (707) 576-2831 or stonc@rbl.swrcb.ca.gov with any questions or comments.
